

CIRCLE H CIVIL CONTRACTORS LLC

Commercial & industrial civil contractor · Everything but the building

Family- & veteran-owned · Paris, Texas · (903) 715-1123 · circlehcivil.com

COMPANY OVERVIEW

Circle H Civil Contractors is the commercial- and industrial-facing company of the Circle H family, built for larger projects. We do everything on a site except the vertical building, for general contractors, developers, industrial and commercial owners and municipalities.

CORE SERVICES

- Site development: raw land to finished pad
- Mass grading, earthwork & building pads
- Underground utilities: water, sanitary sewer, storm
- Concrete paving & parking lot striping
- Concrete: flatwork, curb & gutter, sidewalks
- Roads & streets
- Drainage & stormwater
- Erosion control / SWPPP measures
- Demolition & concrete removal
- Soil stabilization (lime)

HOW EVERY JOB RUNS

- **Dedicated project manager** who owns the schedule, submittals and communication
- **Dedicated foreman** running crews and equipment on site every day
- **One point of contact** from bid to closeout, backed by an accountable chain of command
- **Daily photo & progress reports** on every job

PROJECT EXAMPLES

Real Circle H jobs. Dollar amounts are our contract value for our scope only, not total project cost. Sizes are approximate and come from our contracts, pay applications and project records. Client names stay private; references on request.

Industrial facility: concrete, earthwork & truck lot **Texas · Completed 2026**

Concrete demolition and replacement; Site prep, erosion control and earthwork; Storm drainage; Concrete truck-lot paving and striping.

Our scope: \$2M+ contract value, billed 100% complete

Commercial building site **Arkansas · In progress 2026**

Demolition of the existing building and drive; Building pad over-excavated and rebuilt with geotextile and select fill; Concrete paving, curb and foundation; Water and sewer services.

About 19,770 SF of paving, 895 LF of curb and 4,965 SF of foundation (per plans)

Office-warehouse & self-storage development **Northeast Texas · Completed**

Full site earthwork; Building pad preparation; Site drainage.

Our scope: about \$1.2M contract value. Finished about two weeks ahead of schedule

25 ACRES

Industrial treatment plant site

Oklahoma · Completed

Clearing the property; Removing expansive clay soils; Lime stabilization; Precision grading.

About 25 acres. Our scope: about \$1.8M contract value

EQUIPMENT ON OUR JOBS

- **Dozers:** Cat and Komatsu, including a Cat D6
- **Excavators:** Volvo and Cat excavators, plus mini excavators for tight work
- **Track loaders:** Kubota and Cat compact track loaders
- **Rollers:** Smooth-drum and padfoot rollers for subgrade and pad compaction
- **Hauling:** Semi trucks with lowboy and belly-dump trailers, plus gooseneck equipment trailers
- **Fuel & service:** 1,000- and 500-gallon fuel trailers and a service truck to keep equipment running on site

From our equipment records and job photos. Current list available for your bid.

SAFETY

- **Daily JHA:** A job hazard analysis before work starts: the competent person on site, the utility locate ticket, PPE, equipment checks, first aid kit and the emergency muster point.
- **Trench & excavation:** Trenching follows OSHA 29 CFR 1926 Subpart P: a competent person inspects at the start of every shift and after weather, classifies the soil and sets sloping, benching or shoring.
- **Job-specific plans:** We write a trench and excavation safety plan for your job when you need one for submittals.
- **PPE:** Hard hat, safety glasses, gloves, steel toes and hi-vis on every crew member.
- **Stop work:** Anyone who sees an immediate danger stops the work, moves to safety and warns others.
- **Weekly safety topic:** Every crew covers a weekly safety topic as part of the daily JHA.

Dedication to safety is one of our core values. The goal on every job: everyone goes home safe.
